

ProdTrack Database Tables

Simple guide: kaunsa data kis table mein save hota hai

User aur authentication

Table	Kya data save hota hai
users	Employee ID, full name, username, email, password hash, designation, department, role, Team Lead, account status aur last login time
role	Application roles: Indexer, Team Lead, Core Team aur Administrator
department	Indexing Ops, Production Core, IT/Admin jaise department names
login_event	Login kisne try kiya, successful/failed, IP address, browser/device aur login time
password_reset	Password-reset token, token expiry, user ID aur token kab use hua
app_setting	Authentication method, password-reset method, session timeout aur productivity settings

Project aur assignments

Table	Kya data save hota hai
project	Project code, project name, client name, reporting category, start/end date aur active/inactive status
project_assignment	Kaunsa project kis employee ko assign hua aur assignment date
project_field	Kisi project ke Daily Entry form mein kaunse custom fields dikhne chahiye
reporting_category	Implant Indexing, Field Mapping jaise reporting categories
production_target	Employee/project ka expected productivity target

Daily production

Table	Kya data save hota hai
daily_entry	Production date, project, employee, batch ID, documents received/completed, batches processed, errors, notes aur status
daily_entry_value	Project-specific dynamic field values
entry_status	Daily Entry workflow statuses: Draft, Submitted, Reviewed aur Locked

Correction request

Table	Kya data save hota hai
correction_request	Locked entry ID, old value, corrected value, reason, requester, approver comment aur approval date
correction_status	Correction status: Pending, Approved ya Rejected

Attendance aur leave

Table	Kya data save hota hai
attendance	Employee, attendance date, working hours, status, note aur approver
attendance_status	Present, Absent, Planned Leave, Sick Leave, Holiday, Training aur Other Non-Production
leave_request	Leave type, start/end date, reason, Pending/Approved/Rejected status, Team Lead comment aur approval details

Indexing guides

Table	Kya data save hota hai
guide	Project guide ka title aur project connection
guide_version	Version number, uploaded file, latest-version flag, acknowledgement requirement aur upload date
guide_section	Overview, Guidelines, Indexing Rules, Field Mapping, Examples aur Appendices ka editable content
guide_acknowledgement	Kis employee ne guide ka kaunsa version padha aur acknowledge kiya

Notifications aur system records

Table	Kya data save hota hai
notification	User notification ka title, message, link, read/unread status aur creation time
notification_type	Notification code, email/system channel aur enabled/disabled setting
announcement	Dashboard par dikhne wale announcements aur updates
audit_log	User creation, settings update, approval, locking jaise system changes ka record

Simple example flow

Indexer Daily Entry submit karta hai

users

- > project_assignment se project verify
- > daily_entry mein entry save
- > entry_status se Submitted status
- > notification mein confirmation
- > audit_log mein activity record

Leave apply karta hai

leave_request mein Pending request

- > Team Lead Approve/Reject
- > attendance mein leave record
- > notification mein employee update
- > audit_log mein approval history
